

KENNEDY CATHOLIC PREPARATORY SCHOOL

Welcome to AP Chemistry!

Science may be your passion and the path you will pursue in college. Or, maybe you had a free period in your schedule which you chose to fill with a demanding course such as AP Chemistry. If not, perhaps your schedule could not accommodate the AP course you really wanted to take. Regardless of the reason, be assured that this course will challenge and frustrate; nonetheless, it will ultimately prepare you for the future.

By now, you may have realized that most higher-level science courses are very rigorous and require dedication, practice and more practice.

As with all AP courses, there is never enough time to learn everything in one school year; therefore, you will be tasked with completing August Preparation (AP) work.

To refresh your knowledge of chemistry, please complete the [Summer Assignment](#) and [Lab Supplement](#) at your leisure in the coming weeks; this will allow us to hit the ground running in September.

The Summer Assignment will be collected on the due date on CANVAS. During the first few days of class the Summer Assignment topics will be formally assessed.

If you have any questions, please feel free to contact me via email.

Enjoy the summer!

SiNCeReLi,

Mrs. Venturini
